**Overall****Manager Overall Evaluation****Rating:** 3.6

**Comment:** Connie performed admirably in 2019 achieving a 3.6 rating overall. Her demeanor during statements and EUO's is something that separates her from the other field medical investigators. She does a really great job making the subject feel comfortable which I think helps her get the information she is seeking. Case life is something she struggled with during 2019. We both believe this to be a byproduct of attorney's rescheduling EUO's as they see fit with little consequence. Connie's impact percentage was 78% which was below the team average of 82.5%. We will work together in 2020 to identify any areas where we can improve upon her results in both of these areas.
